

# Motility for Accounting

Control your expenses and manage revenue in real-time.

## The downfall of double entry and disconnected processes.

Are you frequently caught up in basic accounting activities that don't integrate well with other departments? Worse, do you revert to a trusted spreadsheet? No matter how impressive your accounting software may be, you will not have much need for it if it doesn't give you the analytical capabilities that you require. It's inconvenient, time-consuming, and often results in double entry — there's a better way!

## Integrated throughout your business.

With all dealership functions in the same platform, you can seamlessly maintain a singular record of your customers and help grow, retain, and attract new ones. Cutting checks, making deposits, reconciling accounts, and receiving payables has never been easier with Infinity's dealer management solutions.

## Audit ready with complete efficiency.

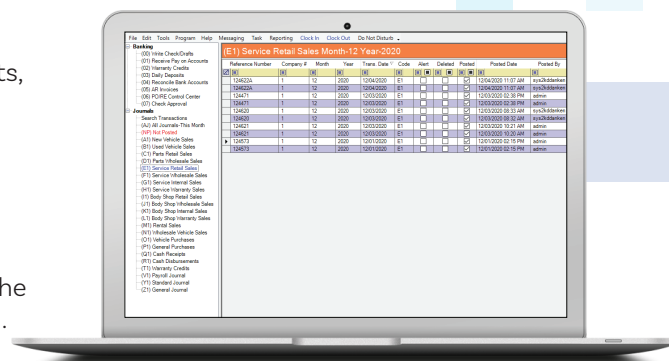

Maintain complete accounting control with input from other areas of the business. Minimize data entry and gain access to real-time information.

## Access to real-time information.

With our robust mobile and reporting interfaces, we deliver on-demand access to the information and insights that matter most. Quickly gain access to accounting history that arms you and your team with the powerful insights you need to manage your business.

## Enterprise-level security offers you peace of mind wherever you are.

With our enterprise-level security, you can rest easy knowing your dealership information is in the hands of an organization that has been in the DMS space for over 35 years.

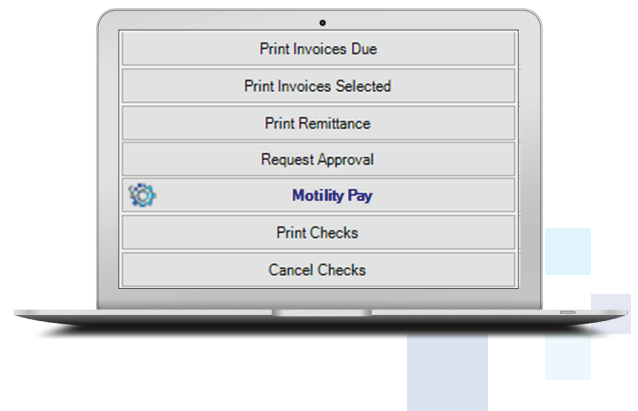

Motility is designed to arm you with actionable data to help you run your Accounting department effectively.

Motility was developed with dealers in mind!

They have been working hand-in-hand with dealers like us on what we need and what we want in a dealer management system. This is a must have and I'd highly recommend Motility to other dealers.

Lane Bell, Bell Camper Sales

Feature	Benefit
Transaction Management	Track accounts payable with convenient on-screen activity display of accounting history for each account. View every transaction for auditing purposes. Update purchase price, add-ons, repairs, additional cost, total cost, floorplan amounts, and PAC cost for each unit.
Seamless Reconciliation	Automatically transfer transactions from other modules to respective journals for seamless reconciliation. Minimize duplicate data entry with access to real-time information that matters most.
Multi-Rooftop Ready	Maintain transactions for multiple companies or profit centers so your dealership can run consolidated financial reports – flexibility at its finest.
Recurring Journal Entries	Easily create recurring journal entries recorded – weekly, monthly, quarterly, or annually.
Accounts Receivable	One-click retrieval of archived transactions.
Accounts Payable	Remove the administrative burden from payables process and eliminate your check cost with our free service, MotilityPay.
Business Intelligence	Access detailed reporting such as unit-level gross profit with seamless integration to Accounting. Maintain audit rediness with complete performance tracking and transaction history.
Financial Statements	Make informed project decisions and forecasts. Provide owners, shareholders, and potential lenders the ability to gauge the financial strength and stability of your dealership.
Integrated Partners	Streamline your business functions with our integrated partner network: Adobe Sign, 700 credit, Elavon, and more.
